

The Leader

All steel heating outfit, is lined with fire brick and is guaranteed for 15 years. It is built like the locomotive on the railroad for long service. It sends the soft warm air through the room and right back to the heater, the germs being killed as the air passes over heating drum. The air is continually renewed with moisture from evaporating pan arranged for that purpose. You would have to breathe quick to breathe the same air twice in succession. Let me plan your basement, do all excavating, put in concrete

floor and walls, install heating plant that is right up to-the-minute. The Leader has stood the test of 40 years.

Troops of American Expeditionary Force in French Camps On Last Leg of Journey to the Firing Line

It is mess time in a camp "somewhere in France" where the American expeditionary force is stationed. Also it is near the fighting lines; how near no one is privileged to tell. Suffice it to say that in this place Gen. Pershing's men are undergoing the finishing training which will prepare them for the rigors of trench warfare during the winter, now almost at hand. The soldiers are at drill. When they return it is very likely that they will be able to eat tacks. But the food to be served is of the best and there is plenty of it. Note the camouflaged tent at the right and the long mess tent behind the field stores. The picture is a peaceful one as shown here, and in this environment Thanksgiving was spent by many of the men.

Here is a company of American soldiers after a drill in a picturesque little village in France. The men are at ease, perhaps awaiting the arrival of officers in the automobile in the right background for inspection. There are many such companies drilling daily in places like this. The expeditionary force under Gen. Pershing has been divided in such a way that the various units may become familiar with the country in which they are training. Needless to say, the Americans are in the pink of condition, as the picture clearly shows. These Sammys will soon be going "over the top" after the Kaiser's men. And they'll get them when they start, too.

HOME-GROWN SEED IS THE SUREST AND BEST SELECT SEED CORN

ENOUGH FOR TWO YEARS

For 1918 Plantings and to Insure Adapted Seed for 1919
START RIGHT---NOW!

WHERE?

In the field from standing stalks of a variety that has "made good" and become locally adapted.

WHEN?

As soon as ears are ripe and hard---before heavy frosts or autumn rains injure the kernels for seed. The day the ears are selected they should be hung where they will become thoroughly dry in a few days.

HOW?

Pick best ears from plants showing best yields in fair competition with neighboring plants. Storm-proof plants with hanging ears give best seed. Long ears with large, uniform kernels are the best. Avoid sappy ears heavy with water.

WHY?

It pays. Field selection of seed corn is one of the surest and best paying operations on the farm. Proper care of seed corn pays well. Tests show that properly cared for seed corn has yielded eighteen bushels more per acre than crib-stored seed from the same field.

Insure a Right Start for Your Next Two
Corn Crops by Saving Ample Seed Now

KILL THE CHILL

These cool mornings by using a Gas Heater to
take the edge off the room.

We have the famous "Hot Spot" heaters. None
better. A call at our office will convince you.

Kentucky Public Service Co.
INCORPORATED.

Cotton seed meal is high, but
we have a large stock.

THE ACME MILLS.
Incorporated.

Many a quarrel would come to a speedy ending if both sides were not afraid of being the first to make advances. Instead of being unwilling to take the first step, you should be glad of the chance. Some of you perhaps, are a little inclined to be envious of the one who is a born leader, who is the first in so many things, but there is no greater honor than to be the first to end a misunderstanding, the first to say, "I'm sorry."—Exchange.

Miss Flora Harris has returned from a visit to her sister, Mrs. Alice Songer, at Pine Bluff, Ark.

American Books in Russia.

The single American book most widely read in Russia is "Uncle Tom's Cabin." Some of Irving's works were translated for the Muscovite public, and the Russian boys have been thrilled by the doings of Leatherstocking and Uncas. Mark Twain is quite popular beyond the Niemen and the Boreas. All in all, it seems that Russians know more American books than Americans know Russian books.

Ben Franklin's audience was the world, so it does not surprise one to learn from a Russian critic that the first American book translated into Russian was the product of Poor Richard's pen. That was 13 years after he died.

Something of a Compromise.

Mina was greatly attached to a neighbor a few blocks away from home, and agreed that she was his little girl, whenever he questioned her about it. One time he said: "Well, if you're really my girl, come home with me to live. Go on and get your hat," Mina hesitated a moment, gazed around the familiar room, and then replied: "I'll be right little girl, but I'll stay here with Papa and Papa."

Evolution of the Wheel.

Naturally, there was a first man to eat an oyster, and there must have been some heroic pioneer to tackle every edible article that is known to civilization today. High authority has bestowed eulogy on the man who invented the wheel, and some have gone so far as to assert that this unidentified genius was the greatest benefactor of the race, but we may doubt if the wheel was really an invention. It seems more likely to have been a gradual discovery, the result of a slow, evolutionary process for which no man or group of men could claim the credit.—Exchange.

Turning the Other Cheek.

"Do trouble 'bout forgiving' an enemy," said Uncle Eben. "Is dat he's liable not to 'preciate yoh forgiveness, an' go on double-crossin' jes' de same."

Guatemala Is Cosmopolitan.

Guatemala is the most cosmopolitan of countries. Although little more than half the size of Great Britain, no fewer than 18 different languages are spoken by its inhabitants. An official proclamation, containing a declaration in each one of these tongues, is a very cumbersome-looking document. The capital of the country—a handsome city of the same name—is laid out on a gridiron plan, with wide streets and a central park.
